INTRODUCTION

There are many ways to create a background for your website. One way is to use a static image. Another way is to use a GIF. A third way is to use a video. Each method has its own advantages and disadvantages. For example, static images are easy to create and can be used for a long time. GIFs are more dynamic and can be used to create a sense of movement. Videos are the most dynamic and can be used to create a sense of immersion.
